

FRONTMATEC

Secure tracing, marking and packing
GO.Pack

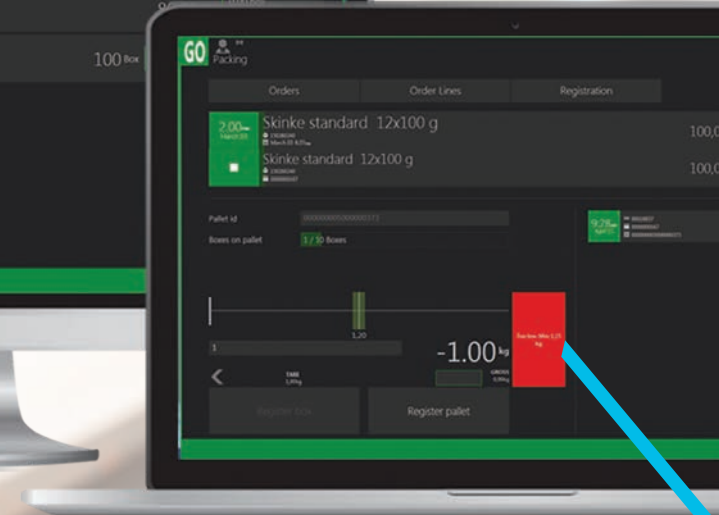

Order activation

An order is activated and the operator can see the quantity that should be packed for the given order. At any time in the process, the operator may track the process, i.e. by color and by a meter

Terminal

The operator has access to the customer orders on the terminal

GO.Pack is a special version of GO.FlexClient, which is developed for manual packing processes. The operator is able to access a user panel via a terminal, while Go.Pack ensures that the manual processes comply with the customer order.

Ensure flawless packing with GO.Pack

How do we ensure fewer picking errors and better traceability for manual packing processes?

Is it possible to achieve complete paperless picking?

What do you achieve?

GO.Pack is developed for manual packing processes. The operator is able to access a user panel via a terminal, while GO.Pack ensures that the manual processes comply with the customer order.

GO.Pack ensures that traceability and yield is handled correct and automatically through the packaging process and is registered instantly. The actual setup is adapted to the specific needs according to the business processes of the customer. A typical application includes a terminal, a scale, a scanner and optionally a printer.

GO.Pack supports all types of scanners, scales and printers with communication capabilities.

The value you get

- Traceability
Traceability of packed items, boxes and pallets
- Fewer errors
Elimination of packing and label errors
- Overview
Overview of produced items directly on screens. Track your orders and order process
- Paperless production
Paperless production order directly to the operator

Order fulfilment

When the order is fulfilled this is shown very clearly on the screen. At that time price/labelling of the colli is possible and is always correct and includes traceability

FRONTMATEC

Frontmatec develops world-leading customized solutions for automation in the food industry, other hygiene sensitive industries and the utilities industry. We are especially renowned for our high-quality systems for the entire value chain of the meat industry – from carcass grading, slaughter lines, cutting and deboning lines, hygiene systems and control systems, to logistics and packaging.
